

Toxicological Pathologist

Location

Barcelona

Company

Patconsult. LAB. S.L. is an independent company, focused on toxicologic histopathology services as well as scientific and technical assessment in the field of preclinical studies, for the research and development of medicines for human and veterinary use.

Position

Toxicological Pathologist

Job Posting

The pathologist's main responsibility is to report and interpret pathology data from all types of studies in Patconsult. LAB under the direct supervision of an experienced pathologist.

The candidate will be responsible for the following tasks:

- Conduct all work in compliance with GLP requirements as it is specified in the study plans.
- Perform the microscopic evaluation and interpretation of tissue sections from animals exposed to test item, including assessment of cause of death, toxicity target organs, and reversibility.
- Provide pathology reports that accurately and completely reflect the data collected and interpret necropsy and histopathology data under the supervision of an experienced pathologist.
- Interact with clients to ensure efficient pathological evaluation of assigned studies.

Skills & Requirements.

- Pathologist with background in toxicologic pathology and experience in interpreting and reporting pathology findings for GLP studies.
- 5 to 8 years' experience in toxicological or investigative pathology in a CRO pharmaceutical or biotechnical industry.
- Excellent interpersonal skills.
- Veterinary degree or equivalent.
- Sound knowledge of toxicology and laboratory animal science.
- Excellent verbal and written communication skills.
- Fluent in English; written and spoken. Knowledge of Spanish would be an advantage.

If your background and personal experience fit the profile, please send your complete application, including a brief description of your experience and your CV, specifying "Toxicological Pathologist" under the subject line to the following address: patconsultbcn@gmail.com
