

Senior Toxicologic Pathologist

Ledbury, Herefordshire

Negotiable Salary + Benefits

Are you an experienced toxicological pathologist seeking a challenging and rewarding opportunity? Sequani is seeking a skilled professional to join our Pathology Sciences Department in Ledbury, United Kingdom. We're looking for a driven professional to take on a pivotal role within our growing team, with excellent opportunities for career progression as the department evolves.

Sequani is a Contract Research Organisation (CRO) and has an outstanding reputation for quality in the field of providing non-clinical safety testing services to the pharmaceutical, agrochemical and chemical industries. We can offer a busy, varied and scientifically challenging working environment. With Investors in People Gold accreditation, we are committed to offering the best training and development for everyone.

Qualifications:

FRCPATH or Diplomate of ACVP or ECVP is necessary

Veterinary degree (DVM, VMD, BVMS, BVSc or equivalent) is necessary

Higher qualification/MSc or PhD is beneficial, but not essential

Responsible for:

- Advising on all aspects of anatomic and clinical pathology requirements in non-clinical safety studies as required for protocols
- Supervising necropsies when required; to ensure dissection, sampling, and preservation according to the protocol requirements, and advise on the description and recording of macroscopic findings
- Performing microscopic evaluation and interpretation of the findings, and to correlate these findings with macroscopic findings, organ weights, and clinical pathology findings
- Interacting with internal and external clients in order to ensure client satisfaction with Pathology Sciences department deliverables
- Supervising, peer-reviewing and advising pathologists in training in collaboration with Head of Pathology Sciences

Sequani Limited

Bromyard Road, Ledbury
HR8 1LH, United Kingdom

Phone: +44 (0)1531 634121

website: www.sequani.com

Experience required:

- Minimum 5 years of experience in laboratory animal pathology/toxicologic pathology
- Demonstrated expertise in reading and evaluating toxicity studies and conducting pathology peer reviews
- Excellent verbal and written communication skills
- Strong collaborative and interpersonal skills
- Experience in working independently and within teams
- Basic computer skills (experience in digital pathology is beneficial)

What we can offer you:

We offer a busy, varied, and scientifically challenging environment, where your expertise will directly contribute to the success of our Pathology Sciences Department.

We are a small friendly company with an unrivalled focus on Quality and Customer service. We pride ourselves in offering competitive salaries and benefits. We offer a Health cash plan, including 24hr GP support line. A life insurance policy for 4x your annual salary, as well as local and countrywide corporate gym memberships. We also have an employee discount scheme to cover all your shopping and holiday discounts needs.
